Work Experience

American City Business Journals

September 2021 - Present

Web Developer

- Used PHP, Zend Framework, and Doctrine in the development of an API that allows users to submit and update a multipage nomination form.
- Developed a Single Page Application using Vuejs to support commerce on the Bizjournals platform. Used in house API's, a third party subscriber management platform, and a PHP backend to support smooth commerce operations for users.
- Increased user engagement and reach by developing an embedded audio feature on articles across the Bizjournals site. This gave users the option to listen to or preview an article.
- Met with stakeholders to present and demonstrate new products and features coming down the development pipeline.

CMHWorks, Purcellville, VA

March 2021 - August 2021

Full Stack Software Developer - Contractor

- Helped to troubleshoot, debug and upgrade data-intensive reporting software by providing a thorough analysis of bugs and implementing optimal solutions within an estimated time frame.
- Regularly used Typescript within the Angular framework to dry-up, debug and refactor code in an effort to prepare the code base for future development.
- Helped to create a backend querying service using Cubejs. Assisted in the creation of SQL queries and pre-aggregations to enhance software performance.
- Used object-oriented programming, C#, Typescript, and AWS Lambdas for a CSV download feature. This feature allows users to download custom reports by querying a cloud-hosted database.
- Participated in a complete refactor of reporting software by breaking report features into modularized Angular components and applying dynamic filtering logic for large data sets using Rxjs.

Search Peak Inc, Charlotte, NC

March 2020 - March 2021

Front End Developer - Contractor

- Implemented custom frontend design of web projects on WordPress sites via theme installation, customized site files, and API integration in PHP.
- Used WordPress theme editor to design and construct pages and posts for multiple sites using HTML.
- Collected relevant data such as images and content needed for the site build and assisted in integrating these mediums on various sites.
